

# MARCRAFT

## FUNDAMENTALS OF Information Technology

**Prepares students for the CompTIA ITF+ Certification**

**Introduction to Information Technology:** Students learn through 90 hours of theory and hands on practice labs covering PCs and other computing devices. Students will build a PC, install software, practice programming and use office software like word processors, databases, spreadsheets, and presentation software. Students also learn the basics of troubleshooting problems.

- Hardware
- Office Software
- Security & Safety
- Operating Systems
- Networking
- Troubleshooting
- Programming
- Internet & Web Design
- ...And Much More!

**Complete with hands-on labs and equipment**

**MARCRAFT** an ETG Brand
